### **Challenges**

The company faced multiple challenges in its journey, which included:

- Fragmented landholdings leading to limited production capacity.
- Difficulty in accessing financial and technological resources.
- Dependence on intermediaries for market access, resulting in low returns.
- Convincing 500 farmers, most of whom were from economically backward sections, to collaborate and contribute financially.
- Mitigating the impact of nature's uncertainties while sustaining farmer participation.

### **Impact**

The company's initiatives have positively impacted the farming community:

- Farmers now have access to high-quality inputs and affordable machinery, resulting in increased productivity and reduced production costs.
- Collective marketing efforts have reduced the burden of selling individual produce and enabled farmers to secure better prices.
- Time and cost savings on inputs have allowed farmers to focus on improving the quality of their yield.
- The integration of technology and better practices has empowered farmers to compete in high-value markets.

## Goal

helps farmers gain better access to markets, technology, and capital. This type of enterprise is essentially a hybrid between a private limited company and a cooperative group, facilitating collective business activities of its farmer members.

## Vision

The vision of Sanrakshit Producer Company Limited (SFPCL) is to improve the economic status of farmers, women and their members and increase their incomes. Provide quality product to society at reasonable price By procuring farmer produce and manufacturing marketable product.
